

MOCK TEXT MESSAGE

There are two ways of sharing a YouTube video with your contacts.

One way is simply to copy and paste the URL onto the body of your text message.

The other way is even easier. Simply:

1. Launch the **YouTube app** from the Home screen of your iPhone or iPad.
2. Find the video that you'd like to share.
3. If there aren't controls already on the screen overlaying the video, **tap on the screen inside the video pane** in order to bring them up.
4. Tap on the **Share button** in the upper right hand corner.
5. Now tap on the **Share** option. It's the very first option.
6. Choose the way you'd like to share the video from the available options that include Facebook, Twitter, Google+, email, messaging, copying the link, and more.

Whichever way you choose to share your new video is up to you. If you have any questions contact your rep for help.

Sincerely,

Fairfield Video Group
